PROFESSIONAL SUMMARY

Final-year Mathematical Modelling and Analytics student graduating in February 2027, with practical experience in **Continuous Process Improvement** at FedEx. Experienced in mapping processes, identifying operational inefficiencies, redesigning workflows and implementing automation using **Power Automate**, **SharePoint** and **Power BI**. Redesigned the AMD pre-alert process to reduce handling time by **78%**, saving approximately **70 minutes daily**. Brings a strong analytical foundation in statistics, optimization, Python, R and SQL.

EDUCATION

BSc. (Hons.) Mathematical Modelling and Analytics October 2023 – February 2027
Universiti Teknologi MARA (UiTM), Cawangan Terengganu, Kampus Kuala Terengganu *CGPA: 3.57*

- Relevant coursework: Business Data Analytics, Programming for Data Science, Database Design and Development, Statistical Modelling, Intelligent Decision-Making Support Systems, Numerical Methods and Analysis.

Foundation in Engineering August 2022 – June 2023
Universiti Teknologi MARA (UiTM), Kampus Dengkil *CGPA: 3.33*

WORK EXPERIENCE

Customer Experience Intern, Premier Customer Care, FedEx (Petaling Jaya) September 2026 – Present
Led three process improvement projects for the PCC MY team, contributing across process mapping, requirements gathering, solution development, testing, handover and job-aid preparation.

AMD Pre-Alert Automation | *Power Automate, Power Apps, SharePoint* *October 2026*

- Redesigned a seven-step manual process involving 10+ email lists across five scenarios into a four-step SharePoint form, standardizing recipient selection, CC and email subject formats.
- Reduced handling time by **78%**, from approximately 2 minutes 15 seconds to 30 seconds per pre-alert, saving about **70 minutes daily** and reducing estimated workload from **0.19 to 0.04 VFTE**, based on five timed runs on the live system.
- Reduced manual error-prone control points from six to three, introduced duplicate-submission controls and improved visibility of pending files for backup staff, eliminating the 15-minute handover process.
- Created a job aid that reduced estimated new-team-member learning time from a full day to approximately 15 minutes.

Claim Review Automation | *Power Automate, SharePoint* *November 2026*

- Streamlined the end-to-end claim workflow from submission and manager approval to customer-letter generation, replacing manually written emails and removing the manual end-stage fixes and wrap-up previously handled by team leaders.
- Standardized settlement letters through a centralized template with wording determined by payment method; added controls to prevent duplicate letters and standardize customer names and country codes.
- Enabled agents, managers and team leaders to track claim status, with approval notifications and comments managed through Outlook and Teams.

Leave Planner PCC-MY | *SharePoint, Power Apps, Power Automate, Power BI* *September 2026*

- Developed a leave-management solution that automatically checks team quota rules and flags same-day clashes, with grid-based approval and a Power BI dashboard providing managers with a consolidated view of leave across teams.
- Deployed the solution for use by PCC MY staff.

Part-Time Mathematics Tutor (SPM Level) Weekends, 2025 – Present

- Teach SPM-level Additional Mathematics by breaking down complex problems into clear steps and adapting explanations to each student's learning pace.

Service Crew, Food & Beverage May – August 2022

- Managed consecutive day and evening shifts across two restaurants while studying full-time, balancing competing schedules and maintaining service responsibilities in a fast-paced environment.

TECHNICAL SKILLS

- **Process Improvement:** Process Mapping, Process Optimization, Process Standardization, Time Study, VFTE Analysis, Before-and-After Performance Measurement, Workflow Automation, Requirements Gathering, Job Aids and Documentation
- **Automation & Business Tools:** Power Automate, Power Apps, SharePoint, Power BI, Microsoft Excel
- **Programming:** Python, SQL, R, Java, C++
- **Analytics & Modelling:** Data Cleaning, Data Validation, Statistical Analysis, Classification, Clustering, Regression Analysis, Predictive Modelling, Feature Selection, Performance Benchmarking
- **Other Tools:** IBM SPSS Statistics, WEKA, MATLAB
- **Languages:** Malay (Native), English (Proficient), Arabic (Basic)

ACADEMIC PROJECTS

Three-Term Conjugate Gradient Optimization in IMRT — Final Year Project MATLAB

- Developed a MATLAB optimization model for radiotherapy treatment planning and benchmarked four algorithms using iteration count and CPU time. Published as first author in IJRISS, Vol. 10, Issue 9 (2026). DOI: 10.47772/IJRISS.2026.100900333.

Dynamic Pricing Model — Malaysia Industrial Mathematical Modelling Challenge 2026 Team Project

- Developed a mathematical model to optimize agricultural machinery rental pricing and support more data-driven pricing decisions.

RR Café Ordering System Database SQL, Microsoft Access

- Designed and normalized a relational database to Third Normal Form (3NF), improving data organization and supporting SQL query execution.

Classification & Clustering of Survey Data WEKA

- Built a data-mining pipeline on a 7,000-record survey dataset, covering data cleaning, feature selection, J48, Random Forest and Naive Bayes classification, and K-means clustering. Evaluated model outputs using accuracy, MAE and confusion matrices.

LEADERSHIP & ACTIVITIES

President, Arabic Club, UiTM October 2024 – December 2025

- Led a student organization of **150+ members** and supervised a **16-member executive committee**, organizing **eight academic, cultural and community outreach programmes**. Coordinated programme planning, sponsorship acquisition, budgeting support, stakeholder communication and task delegation.

Program Director – Program Kecemerlangan: *Bangkit Dengan Kepimpinan, Berdiri Dengan Keyakinan*

- Directed a **14-member organizing committee** delivering a leadership and motivation programme for **60+ secondary school students**. Received recognition from the programme advisor as **one of the best organizing teams**.

Head of Protocol Bureau – Minggu Destini Siswa (MDS) 2025/2026

- Coordinated protocol and programme flow for a week-long orientation involving **350+ new students** and an **11-member committee**. Resolved schedule delays, VIP-arrival changes and technical disruptions through contingency planning.

KOR SUKSIS, UiTM Cawangan Terengganu

- Served in the Kerohanian Bureau and completed courses in police field training (PGA), ethics and integrity, self-defence, and first aid and rescue. Regularly selected as master of ceremonies for official programmes.

SELECTED ACHIEVEMENTS

- Participant, Malaysia Industrial Mathematical Modelling Challenge (MIMMC) 2026
- Silver Medal, PIITRAM 2023 Innovation Competition (PASOO)
- Presenter, PRIDE Innovation Showcase (TREMONO)
- Malaysia Techlympics Facilitator (East Zone)
